

The Breath of Life

OxyQuest is stabilized liquid oxygen that enters our bloodstream quickly. Oxygen is the most important element our bodies require. We know we can't hold our breath or stay underwater for long without oxygen. So, as diseases increase chronic inflammation in our bodies, OxyQuest can help reverse and improve these conditions.

Ingredients:

Purified ionized water (stabilized with oxygen molecules), sodium chloride, magnesium

Suggested Use

Mix 10 drops in 2-4 oz. of fluid, 3 times per day and drink.

Benefits

- Increase Energy
- Increase Respiratory Efficiency
- Improve Blood Circulation
- Enhanced Immune Function
- Reduce Free Radicals
- Kill Infectious Bacteria
- Eliminate Toxins
- Improve Mental Clarity
- Support Dental Health

Quotes from Health Practitioners

Dr. Paris Kidd

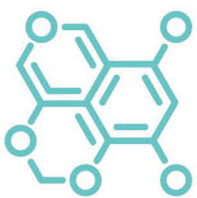

"Oxygen plays a pivotal role in the proper functioning of the immune system, i.e., resistance to disease, bacteria, and viruses..."

Dr. Freibott

"Oxygen is a powerful detoxifier. When its quantity is deficient, toxins, begin to devastate body functions and deplete the live-giving energy."

Dr. Steven Levine

"We can look at oxygen deficiency as the single greatest cause of disease."

OxyQuest can increase the pH and create an alkaline state in our body. Disease can not thrive in an alkaline environment. OxyQuest alkaline liquid oxygen drops contain only negatively charged electrolytes of oxygen. This makes it different from any other oxygen product on the market. The genius of the formula lies in using two of the most abundant and important electrolytes in body fluids; sodium and chloride, to act as the oxygen carriers.

OxyQuest

STABILIZED LIQUID OXYGEN SUPPLEMENT

FREQUENTLY ASKED QUESTIONS

WHAT IS OXYQUEST?

OxyQuest is a revolutionary breakthrough in oxygen supplements. It is a highly effective product containing oxygen stabilized in a highly concentrated form. It contains beneficial negatively charged electrolytes of oxygen in a non-toxic formulation.

HOW IS OXYGEN PUT INTO A STABILIZED FORM?

OxyQuest stabilizes the oxygen compound in a sodium chloride or salt solution. The amount of sodium chloride is negligible and should not pose any risk to people on low-sodium diets. The genius of the formula lies in using two of the most abundant and important electrolytes in body fluids -sodium and chloride - to act as oxygen carriers. The molecular oxygen is released through the digestive process and absorbed into the bloodstream.

WHAT ARE THE SIDE EFFECTS?

No side effects—It has been proven safe. OxyQuest has been used by hundreds of thousands of people for over 30 years with no contra-indication or side effects.

It is the answer to oxygen starvation and is specially developed for people leading today's sedentary lifestyles and with a depletion of the oxygen content in the air.

FREQUENTLY ASKED QUESTIONS

WHY NEGATIVELY CHARGED ELECTROLYTES OF OXYGEN?

OxyQuest is alkaline in nature as it contains only negatively charged electrolytes of oxygen. This makes it different from any other oxygen product on the market. Every element in nature has both positive and negative charged ions. It is well known in science that ion depletion causes a wide range of health problems, both mental and physical.

A high proportion of negative ions around us will make us feel lively, fit and enthusiastic. On the other hand, too many positive ions will cause depression, lethargy, and aches and pains. It is the negative ions (alkaline) that are beneficial to both the body and brain.

The oxygen that we breathe contains both positive and negative molecules. The negative or alkaline molecules are the beneficial portions of oxygen. The positive or acidic molecules are of little value and create free radical activity within the body. Like the negative ions around us, it is the negatively charged molecules of OxyQuest that produce tremendous results.

WHAT ARE THE OXYQUEST FEATURES AND ADVANTAGES?

- It is the only oxygen supplement in liquid form on the market that is stable. It will not dissipate over time.
- It is highly concentrated with oxygen molecules. It contains a 15,000 ppm oxygen molecule which means well over 1,000 times more oxygen than in an equal volume of tap water.
- It is alkaline-based as it contains only negatively charged oxygen electrolytes that help to neutralize the acidity in our bodies.
- It is non-toxic as it has negatively charged oxygen ions that will not create free radical activity.

FREQUENTLY ASKED QUESTIONS

WHAT ARE SOME OF THE BENEFITS OF OXYQUEST?

Research has shown that taking OxyQuest will benefit users in the following ways:

- **INCREASED ENERGY LEVEL** One of the distinct differences between an athlete's body and that of a person who seldom exercises is the amount of oxygen in the blood. When OxyQuest is ingested; it helps in the oxidative process and enhances the utilization of nutrients, thereby providing more energy. When the energy level rises, mental alertness and concentration also improve.
- **INCREASED RESPIRATORY EFFICIENCY** Anyone who has experienced breathlessness associated with asthma, emphysema or sinus disorders knows the importance of oxygen to the body. People with weak lungs can improve their condition through bypassing their often constricted bronchial passages and fortifying the body directly with OxyQuest.
- **STOPS INFECTIONS** OxyQuest kills bacteria without the side effects of antibiotics. It is therefore effective against candidiasis, sore throats, ulcers and kidney infections, to name a few.
- **STRENGTHENS IMMUNE SYSTEM** Oxygen has been shown to boost the white blood cells that make up our immune system, thereby helping to prevent diseases. For example, the growth of cancerous cells can be restricted in the presence of oxygen.
- **IMPROVES BLOOD CIRCULATION** Once OxyQuest is ingested; the oxygen will be absorbed into the blood, improving circulation. This is especially beneficial to those who spend long hours in air-conditioned offices and who suffer from cold hands and feet.

FREQUENTLY ASKED QUESTIONS

WHAT ARE SOME OF THE BENEFITS OF OXYQUEST?

Research has shown that taking OxyQuest will benefit users in the following ways:

- **ELIMINATES TOXINS** OxyQuest aids in removing cellular waste from the body. By limiting free radical activity that damages body cells, it enhances the complexion and slows down the aging process.
- **IMPROVES MENTAL HEALTH** OxyQuest promotes better concentration and alertness, increases energy levels and elevates one's sense of well-being.
- **PREVENTS TOOTH DECAY AND GUM DISEASE** OxyQuest helps to prevent bad breath. Dentists have used it with great success to control gum disease and tooth decay.

HOW LONG DOES IT TAKE TO FEEL THE EFFECTIVENESS OF OXYQUEST?

- **Fast Action**—Almost instant results can be seen after taking OxyQuest, particularly for those suffering from anemia, dizziness or respiratory problems. **Promotes radiant Health**—It is beneficial to the heart, resulting in a strong pulse, rosy skin and better blood circulation.

WHAT ARE THE OTHER USES OF OXYQUEST?

- **PURIFICATION OF WATER** Adding OxyQuest to untreated water will remove chlorine and kill bacteria and organisms. It is especially useful while traveling to purify drinking water.

FREQUENTLY ASKED QUESTIONS

WHAT ARE THE OTHER USES OF OXYQUEST?

- **WASHING FRUIT & VEGETABLES** OxyQuest can be used to wash fresh fruit and vegetables to eliminate harmful organisms and keep them fresh longer.

WHO SHOULD TAKE OXYQUEST?

Everyone will benefit from taking or using OxyQuest, however, the following groups of people will stand to gain more with noticeable results immediately.

- **PEOPLE WITH RESPIRATORY PROBLEMS** Those who have experienced the trauma of loss of breath associated with asthma, emphysema, sinus disorders or any respiratory problems can achieve instant results by taking OxyQuest as it can be used to fortify the blood directly.
- **PEOPLE WHO NEED MENTAL ALERTNESS** People who travel frequently in air conditioned vehicles and those who are studying or working in air-conditioned rooms need more oxygen. As the brain cells are the first to be adversely affected if there is a lack of oxygen, taking OxyQuest helps maintain concentration and alertness.
- **PEOPLE WHO NEED MORE ENERGY** Anyone who feels tired, lethargic or has poor vitality will receive remarkable results if OxyQuest is ingested.
- **PEOPLE WITH INFECTIONS** OxyQuest has proven to be able to kill all forms of anaerobic bacteria and are therefore an effective tool for any infection.
